Interactive kitchens

Kitchens with panelled pre-laminated or foil shutters. Various storages with various types of accessories are for storing different items. The island top doubles up as an interaction top.

Kitchen shutter options

Pre-laminated shutter

Membrane Shutter

Foil Shutter

Glass Shutter

Glass Shutter

Various types of shutters give diverse look to a kitchen. Shutters of any particular type or a combination of two types are used. The choice depends on the functionality and aesthetic taste.

Traditional kitchen ideas

A kitchen has to be functional. And it has to be smart as well. The kitchen collection presented here ranges from the basic range to the most premium once. But even our basic kitchen designs are functional, smart yet aordable.

Contemporary kitchen cabinets

Kitchen units having high gloss shutters are the flavour of today. These shutters can be made of high gloss foil or melamine. The result is a highly illuminated and up market kitchen. Additional features like task lights etc can be include as per design.

Kitchen layout concepts

The kitchen triangle

Three main work areas—Refrigerator, cooking range and sink.

Connect these three locations with lines to form a triangle. Then estimate the length of each triangle side — in other words, the distance from one work area to the next. The sum of the three sides should be between 12 and 26 feet. If the total is less than 12, the areas are probably too close for comfort. If it's greater than 26, they're pretty far apart and you'll waste time and effort moving between work areas. As you plan your layout, also keep in mind tables, islands and peninsulas that bisect your triangle, as well as how traffic flows through your kitchen.
